PORTABLE ULTRASONIC STADIOMETER

# Accurate height in seconds — no wall required.

### Charder HM250U Portable Ultrasonic Stadiometer

Dual ultrasonic sensors and an auto-calibrating G-sensor deliver consistent readings on any floor, for children and adults.

PORTABLE · BLUETOOTH

**2–250 cm**
measuring range (0.8–98.4 in)

**99**
readings in memory

**Bluetooth**
data transfer

## Why clinicians choose the HM250U

**Contact-free accuracy**
Dual ultrasonic sensors reduce errors from posture and head position for reproducible results.

**Accurate on any floor**
The auto-calibrating 3D G-sensor compensates for surface inclination.

**From children to adults**
A 2–250 cm range covers pediatric growth tracking and adult BMI.

**Straight to your records**
Bluetooth transfer to computers, tablets and health record systems.

**A small height error becomes a bigger BMI error.**
BMI uses height squared, so measurement errors are amplified. Ultrasonic measurement with auto-calibration keeps readings consistent between staff and sites.

HOW IT WORKS

1. **Position** — Place the HM250U on the patient's head.
2. **Measure** — Dual ultrasonic sensors read height instantly.
3. **Record** — Send by Bluetooth or recall from memory.

WHY TRUST IT — FDA registered & listed · Charder ISO 13485 quality system · 12-month warranty on every unit

IDEAL FOR — Pediatric clinics · Clinical nutrition · Mobile health units · School health · Sports medicine

**Free shipping** Anywhere in the U.S.
**12-month warranty** On all Charder equipment
**30-day returns** Simple, no-hassle process
**Expert support** Before and after you buy

# Height measurement that goes where you go

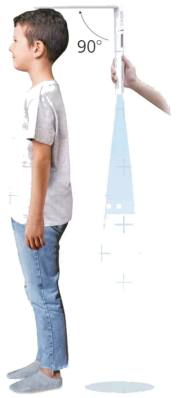

## Measures

Height | Length range 2–250 cm

## Specifications

| | |
