PEDIATRIC WEIGHING & LENGTH STATION

Calm, accurate measurements for your smallest patients.

Charder MS5900 Infant Scale · HM80M Infantometer

A large contoured tray, hold and milk-intake functions, plus an optional infantometer for a complete growth station.

NEONATAL & PEDIATRIC

2 g
graduation up to 33 lb

Hold
locks moving readings

35–80 cm
length with HM80M

Why pediatric teams choose this station

Secure and comfortable
Large ergonomically contoured tray with gently sloped edges and an anti-tilt design.

Stable readings, even with movement
Hold function and software-controlled damping lock in an accurate weight.

Feeding insight
Milk-intake function tracks feeding amounts; tare subtracts diaper or blanket weight.

Weight and length together
Add the HM80M infantometer: 35–80 cm with 1 mm graduation, sliding caliper design.

For infants, every gram tells a story.
2 g graduation and a hold function capture small changes in weight and feeding — even when the baby moves.

HOW IT WORKS

1. **Tare** — Zero out the blanket or diaper.
2. **Weigh** — Place the baby; Hold locks the reading.
3. **Measure length** — Slide the HM80M caliper for length.

WHY TRUST IT — FDA registered & listed · Charder ISO 13485 quality system · 12-month warranty on every unit

IDEAL FOR — Neonatal care · Pediatric clinics · General practice · Lactation support · Clinical nutrition

Free shipping Anywhere in the U.S.
